Please consider this my objection to your clean-up plan proposed for the Willamette River Superfund Site. I am unhappy about the very limited scope of the mitigation that will be achieved with this plan.

Please revise your proposal to ensure removal of a minimum of 1,000 acres of polluted sediment from the river. Outcome objectives need to include (1) removal of the Fish Consumption Advisory so that eating fish from the Lower Willamette is just as safe as eating fish from anywhere else in the Willamette River system, to be achieved within a 10- to 20-year timeframe; (2) dredging and proper disposal of toxic waste from the area in question; and (3) accountability assigned to the entities which have liability for the pollution, including financial responsibility for comprehensive clean-up, not superficial fixes or "spins" that largely serve these entities' public relations purposes.
